

# Data assimilation activities@SHMU

M. Derková, M. Imrišek, M. Neštiak, A. Simon

RC LACE DA working days online, 5-6 Sept 2024

# ALADIN (ALARO) systems at SHMU

CSC	A-LAEF	ALADIN/SHMU	ALA2e	RUC1/ALA1
<i>status</i>	operational (common RC LACE)	operational		test mode
<i>code version</i>	CY40T1bf07+	CY46T1bf07	CY48T3	CY46T1bf07
<i>physics</i>	ALARO-1vB (multi-physics + surface SPPT)		ALARO-1vB	
<i>dx</i>	4.8 km	4.5 km	2.0 km	1.0 km
<i>points</i>	1250 x 750	625 x 576	512 x 384	1024 x 768
<i>vertical levels</i>	60	63	87	87
<i>time step</i>	180 s	180 s	90 s	30 s
<i>forecast ranges + frequency</i>	72/-/72/- hourly	78/72/72/60 hourly	72/-/72/- hourly	hourly, up to +12h or 48h (ALA1)
<i>coupling model</i>	ECMWF ENS (c903@cy48t2), 6h (time-lagged)	ARPEGE (long- & short cut off), 3h	ECMWF, 3h (time-lagged)	ARPEGE (time-lagged), 1h, SCC
<i>surface data assimilation</i>	ensemble surface data assimilation (ESDA) by CANARI	CANARI	A-LAEF CNTRL init downscaling	CANARI
<i>upper-air data assimilation</i>	spectral blending by DFI	Blending by DFI + 3D-Var		3D-Var
<i>initialization</i>	none	none	DFI	DFI
<i>HPC</i>	Atos Sequana XH2000 AMD (ECMWF)	NEC HPC – 240 nodes, 6230 Intel Xeon Gold Scalable Processors (Cascade Lake), Omni-Path, Linux		
<i>nodes</i>	85	40	40	40

# UPGRADES

... since last RC LACE DA WD

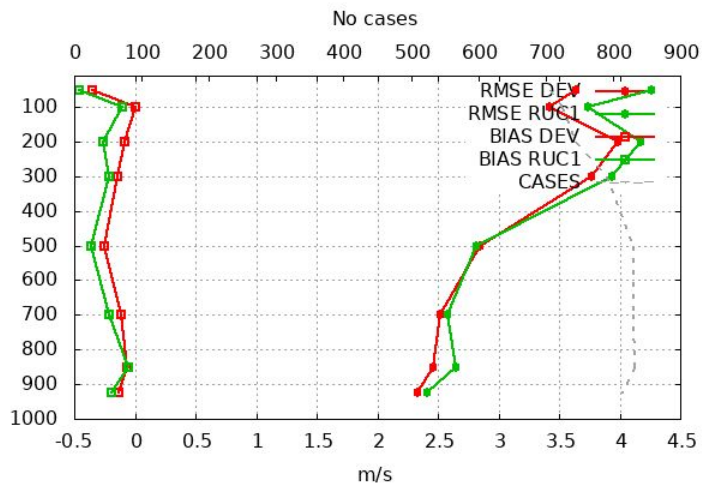

- no principal changes in upper-air 3D-Var + blending setup (observations, algorithmics)
- upgrade to **CY46T1\_bf07** export + bugfixes - ALADIN/SHMU and RUC1
- treatment of sea surface temperature SST - ALADIN/SHMU and RUC1: blendsur replaced by **relaxation to SST from LBC0** (after CHMI)
- RUC1/ALA1 - **DFI** added, **L87**

# RUC1: CY46t1+L87+DFI+new clim...

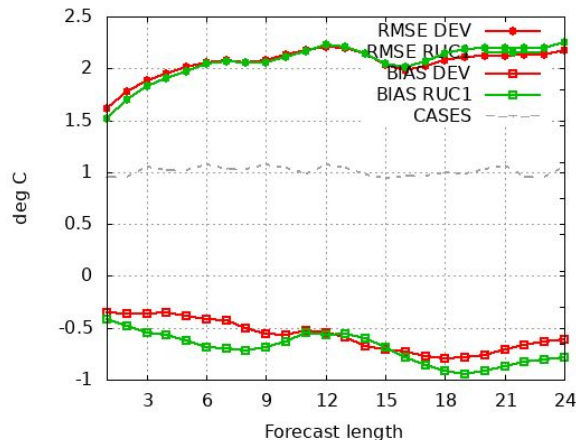

M.Nestiak, A.Simon, M. Imrisek

new setup **DEV** vs. old **RUC1**, Dec 2023: overall improvement

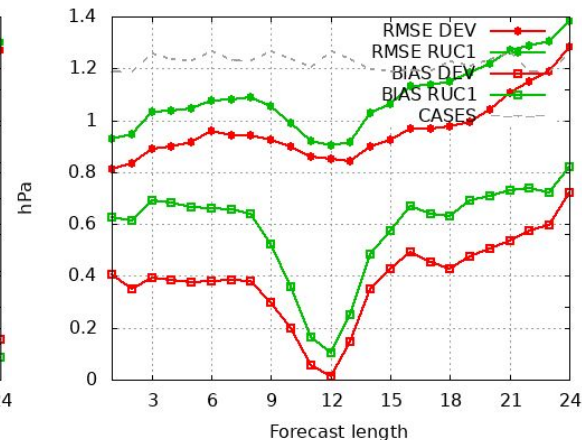

12 stations Selection: ALL  
Wind speed Period: 20231201-20231231  
Used {00} + 00 12 24

Selection: ALL using 385 stations  
T2m Period: 20231201-20231231  
Hours: {00}

Selection: ALL using 294 stations  
Mslp Period: 20231201-20231231  
Hours: {00}

# IN PROGRESS - ALADIN/SHMU

M. Imrisek

- increase of vertical levels L63 ---> L87. Motivation: more levels are better suited for assimilation of GNSS ZTD?
- retuning of DFI blending; coupling TCC ---> SCC
- scores (July 2024) ~neutral?
- tbc.

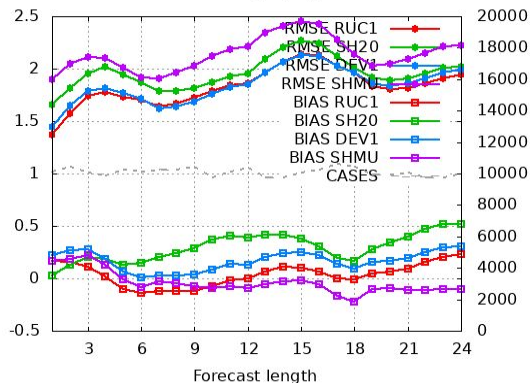

# IN PROGRESS - RUC1

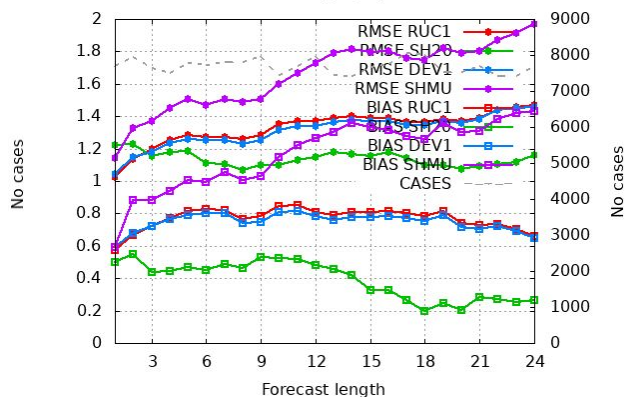

A.Simon

- upgrade CY46t1\_bf07 ---> CY46t1\_bf07 + CHMI modset (incl. graupels)
- smoothing of soil wetness index + 3h cycling + ...
- summers scores (July 1-15 2024) impression mixed **RUC1** vs. **DEV1** (new)
- summer case studies ongoing

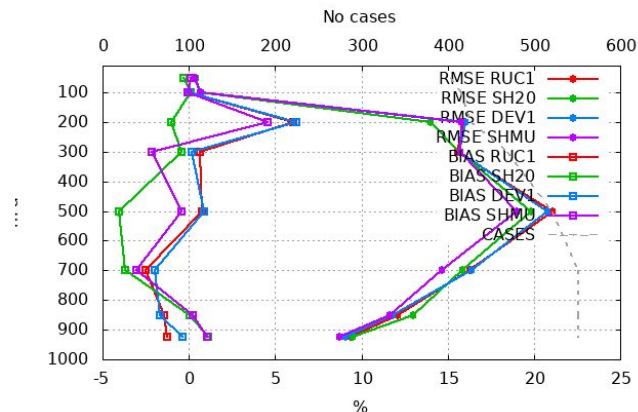

Selection: ALL using 363 stations  
T2m Period: 20240701-20240715  
Hours: {00,12}

Selection: ALL using 278 stations  
Mslp Period: 20240701-20240715  
Hours: {00,12}

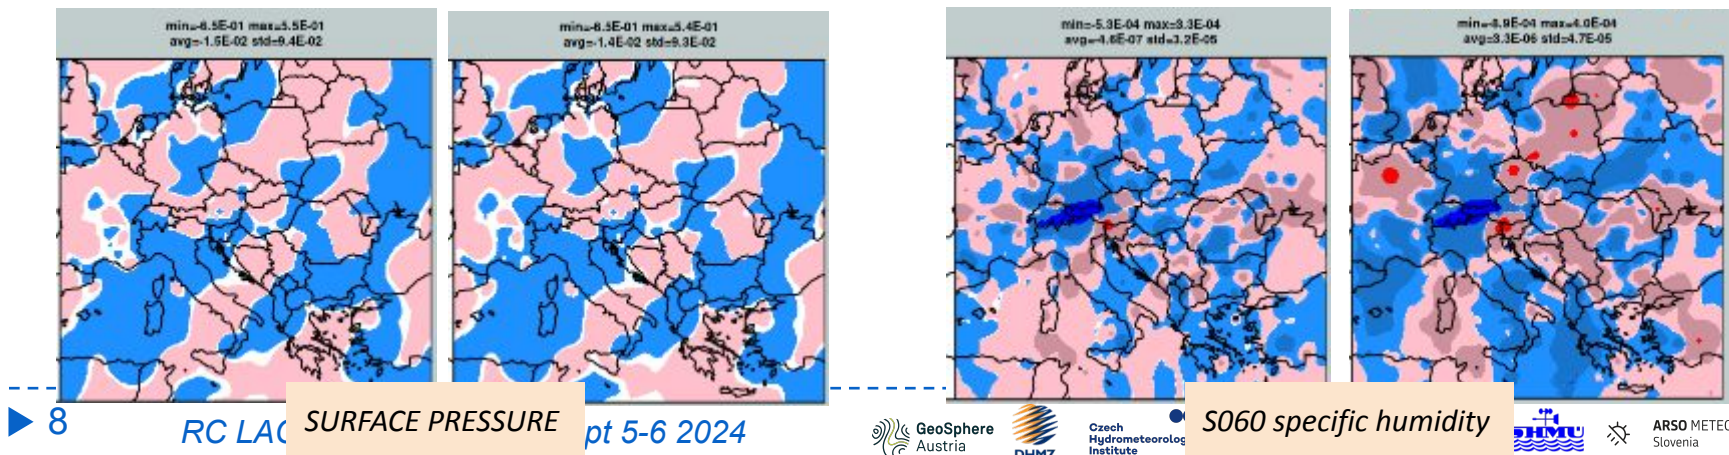

11 stations Selection: ALL  
Relative humidity Period: 20240701-20240715  
Used {00,12} + 00 12 24

# IN PROGRESS - OOVAR

M.Imrisek, O. Spaniel

- technical installation: compilation + run on CY48T3(\_export)
- following Beni's document *The OOPS system for data assimilation - a short user introduction*
- the differences between OPER-MASTERODB (left panels) and OPER-OOVAR (right panels) are in remarkable match with slightly more extremes in OOVAR (OPER=CY46t1bf07)

# ALREADY REPORTED & STAYS

- M. Petrovic: initialisation experiments in RUC1 (diploma thesis) - IAU, **DFI**, IDFI
- M. Nestiak: Automated comparison of NIMBUS/OIFS products
- M. Imrisek: Introduction of GNSS STD to ALADIN NWP system
  
- M. Petrovic: Data assimilation and validation of radar radial winds observations (report under preparation)

# FUTURE PLANS

- assimilation of SEVIRI (M. Petrovic)
- assimilation of GNSS (M. Imrisek)
- upgrades of RUC1 (M. Nestiak, A. Simon)
